

How can you benefit from a monthly health consultation & weekly weigh-in?

Accountability- Successful dieters lose weight if they are accountable for their weight loss. Weekly weigh-ins are a proven method of a victorious weight loss program.

Monitoring your health and progress- Your health is our main concern and routine appointments allow us to ensure that your weight loss program yields results and you achieve improved health.

Natural Products and Prescriptions- The products that we recommend and prescribe when you first enroll are examined at each appointment to ensure effectiveness. Adjustments are made to fit your individual program.

MAKE THE DECISION TODAY

Make the decision today that will change the rest of your life! Begin a journey that will help you reach your weight loss goals and teach you how and what you should be eating. We offer a personal approach to guide you along the way.

Losing weight, living and maintaining a healthy lifestyle, can be one of the most rewarding decisions you make. Weight reduction is gradual but can be accomplished with determination and a good plan. We at Weight Loss Solutions do not recommend a crash diet program. Our programs use regular grocery store food and stress steady, consistent weight loss.

We believe a long productive life is dependent on maintaining a proper diet and ideal weight, regular exercise, and proper management of stress. There are many health benefits to reaching your ideal weight, including lowering of blood pressure, reduction of cholesterol and triglycerides, and a reduced work load on your heart. Not to mention looking and feeling your best!
